American Journal of Hypertension

JOURNAL OF THE AMERICAN SOCIETY OF HYPERTENSION

CUMULATIVE CONTENTS

NUMBER 1, JANUARY 2003

Original Contributions

Reduction of Pressor Response to Vasoconstrictor Agents By Overexpression of Catalase in Mice 1–5
Hong Yang, MingJian Shi, Holly VanRemmen, XinLian Chen, Jan Vijg, Arlan Richardson, and ZhongMao Guo

Influence of Dietary Salt Intake on the Response of Isolated Perfused Mesenteric Veins of the Dog to Vasoactive Agents 6–10
Roger Hainsworth, Olusoga A. Sofola, Alex J.P. Knill, and Mark J. Drinkhill

Endothelial Damage and Angiogenesis in Hypertensive Patients: Relationship to Cardiovascular Risk Factors and Risk Factor Management 11–20
Dirk C. Felmeden, Charles G.C. Spencer, Funmi M. Belgore, Andrew D. Blann, D. Gareth Beevers, and Gregory Y.H. Lip

Calcium Exerts a Larger Regulatory Effect on Potassium$^+$ Channels in Small Mesenteric Artery Mycoytes From Spontaneously Hypertensive Rats Compared to Wistar-Kyoto Rats 21–27
Robert H. Cox, Irina Lozinskaya, and Nancy J. Dietz

Influence of Nitric Oxide on Neurogenic Contraction and Relaxation of the Human Gastroepiploic Artery 28–32
Pascual Medina, Gloria Segarra, Marta Peiro, Blas Flor, Juan B. Martínez-León, José M. Vila, and Salvador Lluch

Effects of Omapatrilat on Blood Pressure and Renal Injury in L-NAME and L-NAME Plus DOCA-Treated Rats 33–38
Isabel Rodriguez-Gomez, Rosemary Wangensteen, Noemi M. Atucha, Francisco O'Valle, Raimundo G. Del Moral, Joaquin Garcia-Estañ, Felix Vargas, and Antonio Osuna

Short-Term Predictors of Maintenance of Normotension After Withdrawal of Antihypertensive Drugs in the Second Australian National Blood Pressure Study (ANBP2) 39–45
Mark R. Nelson, Chris M. Reid, Henry Krum, Philip Ryan, Lindon M.H. Wing, and John J. McNeil, on behalf of the Management Committee, Second Australian National Blood Pressure Study

Different Drug Classes Have Variable Effects on Blood Pressure Depending on the Time of Day 46–50
Trefor O. Morgan and Adrianne Anderson

Efficacy and Safety of a Once Daily Graded-Release Diltiazem Formulation in Essential Hypertension 51–58
Stephen P. Glasser, Joel M. Neutel, Theophilus J. Gana, and Kenneth S. Albert

Detection of a Receptor for Angiotensinogen on Placental Cells 59–62
Duane A. Tewksbury, Nan Pan, and Steven J. Kaiser

Brief Communications

Caffeine Increases Aortic Stiffness in Hypertensive Patients 63–66
Charalambos Vlachopoulos, Kozo Hirata, Christodoulos Stefanadis, Pavlos Toutouzas, and Michael F. O'Rourke

Hemodynamic Effects of Nicotinic Acid Infusion in Normotensive and Hypertensive Subjects 67–71
Crystal A. Gadegbeku, Arachelvi Dhandayuthapani, M. Zakaria Shrayyef, and Brent M. Egan

Decreased Plasma Adiponectin Concentration in Patients With Essential Hypertension 72–75
Marcin Adamczak, Andrzej Więcek, Tohru Funahashi, Jerzy Chudek, Franciszek Kokot, and Yuji Matsuzawa

Gestational Age and Birth Weight in Relation to Aortic Stiffness in Healthy Young Adults: Two Separate Mechanisms? 76–79
Anath Oren, Lydia E. Vos, Willem-Jan W. Bos, Michel E. Safar, Cuno S.P.M. Uiterwaal, Wim H.M. Gorissen, Diederick E. Grobbee, and Michiel L. Bots

0895-7061/03/$30.00

Published by Elsevier Inc.

Review

Aldosterone-Induced Cardiac Damage: Focus on Blood Pressure Independent Effects 80–86
Bernhard M.W. Schmidt and Roland E. Schmieder

Editorials

When Can the Practicing Physician Suspect White Coat Hypertension? Statement From the Working Group on Blood Pressure Monitoring of the European Society of Hypertension 87–91
Paolo Verdecchia, Eoin O'Brien, Thomas Pickering, Jan A. Staessen, Gianfranco Parati, Martin Myers, Paolo Palatini, on behalf of the European Society of Hypertension Working Group on Blood Pressure Monitoring

DASH-Sodium Trial: Where Are the Data?. 92–94
David A. McCarron

Letters to the Editor 95–101

NUMBER 2, FEBRUARY 2003

Original Contributions

A New Model of Isolated Systolic Hypertension Induced By Chronic Warfarin and Vitamin K_1 Treatment 103–110
Rachida Essalihi, Huy Hao Dao, Nobuharu Yamaguchi, and Pierre Moreau

Angiotensin II AT1 Receptor Blockade Improves Renal Perfusion in Hypercholesterolemia 111–115
Alejandro R. Chade, Martin Rodriguez-Porcel, Steven J. Rippentrop, Amir Lerman, and Lilach O. Lerman

Effect of Efonidipine and ACE Inhibitors on Proteinuria in Human Hypertension With Renal Impairment 116–122
Koichi Hayashi, Hiroo Kumagai, and Takao Saruta

Effect of AT_1 Receptor Blockade on Endothelial Function in Essential Hypertension 123–128
Arnfried U. Klingbeil, Stefan John, Markus P. Schneider, Johannes Jacobi, Renate Handrock, and Roland E. Schmieder

Leukocyte Angiotensin II Levels in Patients With Essential Hypertension: Relation to Insulin Resistance 129–134
Noboru Fukuda, Mari Nakayama, Teng Jian, Chikara Satoh, Tomohiro Nakayama, Masayoshi Soma, Yoichi Izumi, and Katsuo Kanmatsuse

Effects of Nabumetone, Celecoxib, and Ibuprofen on Blood Pressure Control in Hypertensive Patients on Angiotensin Converting Enzyme Inhibitors 135–139
Robert Palmer, Robert Weiss, Randall M. Zusman, Ann Haig, Susan Flavin, and Brian MacDonald

Systolic Blood Pressure Is the Main Etiology for Poorly Controlled Hypertension 140–143
Muhammad G. Alam and Yousri M. Barri

Brief Communications

A Meta-Analysis of Genome-Wide Linkage Scans for Hypertension: The National Heart, Lung and Blood Institute Family Blood Pressure Program 144–147
Michael A. Province, Sharon L.R. Kardia, Koustubh Ranade, Dabeeru C. Rao, Bonnie A. Thiel, Richard S. Cooper, Neil Risch, Stephen T. Turner, David R. Cox, Steven C. Hunt, Alan B. Weder, and Eric Boerwinkle

A Genome-Wide Affected Sibpair Linkage Analysis of Hypertension: The HyperGEN Network 148–150
Dabeeru C. Rao, Michael A. Province, Mark F. Leppert, Al Oberman, Gerardo Heiss, R. Curt Ellison, Donna K. Arnett, John H. Eckfeldt, Karen Schwander, Steve C. Mockrin, and Steve C. Hunt

A Genome-Wide Linkage Analysis Investigating the Determinants of Blood Pressure in Whites and African Americans. 151–153
Bonnie A. Thiel, Aravinda Chakravarti, Richard S. Cooper, Amy Luke, Sue Lewis, Audrey Lynn, Hemant Tiwari, Nicholas J. Schork, and Alan B. Weder

Genome-Wide Linkage Analyses for Hypertension Genes in Two Ethnically and Geographically Diverse Populations 154–157
Sharon L.R. Kardia, Laura S. Rozek, Julia Krushkal, Robert E. Ferrell, Stephen T. Turner, Richard Hutchinson, Andrew Brown, Charles F. Sing, and Eric Boerwinkle

A Genome Scan for Hypertension Susceptibility Loci in Populations of Chinese and Japanese Origins 158–162
Koustubh Ranade, David Hinds, Chao Agnes Hsiung, Lee-Ming Chuang, Mau-Song Chang, Ying-Tsung Chen, Robert Pesich, Joan Hebert, Yii-Der I. Chen, Victor Dzau, Richard Olshen, David Curb, David Botstein, David R. Cox, and Neil Risch

Editorials

Large-Scale Search for Genes Predisposing to Essential Hypertension. 163–166
Jean-Marc Lalouel

Genome Scans for Hypertension and Blood Pressure Regulation 167–171
Nilesh J. Samani

NUMBER 3, MARCH 2003

Original Contributions

Lipoic Acid Prevents Hypertension, Hyperglycemia, and the Increase in Heart Mitochondrial Superoxide Production. 173–179
Adil EL Midaoui, Aziz Elimadi, Lingyun Wu, Pierre S. Haddad, and Jacques de Champlain

Left Ventricular Mass Regression in the LIFE Study: Effect of Previous Antihypertensive Treatment 180–186
Gerard P. Aurigemma, Richard B. Devereux, Kristian Wachtell, Vittorio Palmieri, Kurt Boman, Eva Gerdts, Markku S. Nieminen, Vasilios Papademetriou, and Bjorn Dahlöf

Effectiveness of Furosemide in Uncontrolled Hypertension in the Elderly: Role of Renin Profiling 187–193
Horia L. Vlase, Georgia Panagopoulos, and Michael F. Michelis

The Magnitude of Sympathetic Hyperactivity in Pregnancy-Induced Hypertension and Preeclampsia 194–199
John P. Greenwood, Eleanor M. Scott, James J. Walker, John B. Stoker, and David A.S.G. Mary

Differences in Circadian Blood Pressure Variability During Gestation Between Healthy and Complicated Pregnancies. 200–208
Ramón C. Hermida, Diana E. Ayala, Artemio Mojón, José R. Fernández, Ignacio Alonso, María F. Aguilar, Rafael Ucieda, and Manuel Iglesias

Impact of Abnormal Nocturnal Blood Pressure Fall on Vascular Function 209–213
Andreas G. Marinakis, Gregory P. Vyssoulis, Andreas P. Michaelides, Eva A. Karpanou, Dennis V. Cokkinos, and Pavlos K. Toutouzas

Differential Regulation of Osteopontin Expression in the Clipped and Nonclipped Kidney of Two-Kidney, One-Clip Hypertensive Rats 214–222
Stefan Gauer, Andrea Hartner, Ingeborg A. Hauser, Wolfgang Fierlbeck, Wolfgang Eberhardt, and Helmut Geiger

Role of Endothelin-1 Induced By Insulin in the Regulation of Vascular Cell Growth 223–228
Michiko Nagai, Kei Kamide, Hiromi Rakugi, Shin Takiuchi, Michio Imai, Iwao Kida, Naomichi Matsukawa, Jitsuo Higaki, and Toshio Ogihara

Brief Communications

Spurious Systolic Hypertension of Youth: Fit Young Men With Elastic Arteries 229–232
Azra Mahmud and John Feely

Relationship Between Bone Mineral Density and Angiotensin Converting Enzyme Polymorphism in Hypertensive Postmenopausal Women 233–235
José Luis Pérez-Castrillón, Isabel Justo, Jesús Silva, Alberto Sanz, Juan Carlos Martín-Escudero, Rosa Igea, Pilar Escudero, Carol Pueyo, Cristina Diaz, Gonzalo Hernández, and Antonio Dueñas

Diastolic Blood Pressure Is the First to Rise in Association With Early Subclinical Obstructive Sleep Apnea: Lessons From Periodic Examination Screening 236–239
Yehonatan Sharabi, Alon Scope, Natasha Chorney, Itamar Grotto, and Yaron Dagan

Correlates of Myocardial Oxygen Demand Measured By Positron Emission Tomography in the Hypertrophied Left Ventricle 240–243
Olakunle O. Akinboboye, Nathaniel Reichek, Steven R. Bergmann, and Ru-Ling Chou

Nitric Oxide Is a Determinant of Membrane Fluidity of Erythrocytes in Postmenopausal Women: An Electron Paramagnetic Resonance Investigation 244–248
Kazushi Tsuda, Yukiko Kinoshita-Shimamoto, Keizo Kimura, and Ichiro Nishio

Review

Factors Influencing Arterial Stiffness in Systolic Hypertension in the Elderly: Role of Sodium and the Renin-Angiotensin System 249–258
Michel E. Safar and Athanase Benetos

Editorials

Membrane Fluidity and Hypertension 259–261
Kazushi Tsuda and Ichiro Nishio

Pseudo Hypertension of Youth: Too Much of a Good Thing? 262–264
John R. Cockcroft, Carmel M. McEniery, and Ian B. Wilkinson

NUMBER 4, APRIL 2003

Original Contributions

Reduced Small Artery But Not Large Artery Elasticity Is an Independent Risk Marker for Cardiovascular Events 265–269
Elizabeth Grey, Chris Bratteli, Stephen P. Glasser, Cheryl Alinder, Stanley M. Finkelstein, Bruce R. Lindgren, and Jay N. Cohn

Ethnic Differences in the Hemodynamic Mechanisms of Ambulatory Blood Pressure Regulation 270–273
Andrew Sherwood, Joel W. Hughes, and Judy McFetridge

Abnormal Vasoactive Hormones and 24-Hour Blood Pressure in Obstructive Sleep Apnea 274–280
Dorthe S. Møller, Pernille Lind, Benedicte Strunge, and Erling B. Pedersen

Diminished Renal Kallikrein Responses to Mineralocorticoid Stimulation in African Americans: Determinants of an Intermediate Phenotype for Hypertension 281–289
Caroline M. Wong, Daniel T. O'Connor, Joseph A. Martinez, Mala T. Kailasam, and Robert J. Parmer

Association of PAI-1 Gene Promoter 4G/5G Polymorphism With Plasma PAI-1 Activity in Chinese Patients With and Without Hypertension 290–296
Jing-Ren Jeng

Is Fasting Blood Glucose a Reliable Parameter for Screening for Diabetes in Hypertension? 297–301
Andreas Bur, Harald Herkner, Christian Woisetschläger, Marianne Vlcek, Ulla Derhaschnig, and Michael M. Hirschl

Short-Term (5-Day) Changes in Food Intake Alter Daily Hemodynamics in Rabbits 302–306
Vladan Antic, Abdul Dulloo, and Jean-Pierre Montani

Protective Effects in Ambulatory Blood Pressure and Centralized Injuries in Hydrocephalic Dahl Rats on High and Low NaCl Diets 307–311
Jong Y. Lee

Amiloride Reduces Stroke and Renal Injury in Stroke-Prone Hypertensive Rats 312–318
Reza Sepehrdad, Praveen N. Chander, Alafuro Oruene, Louis Rosenfeld, Seymour Levine, and Charles T. Stier, Jr

Brief Communications

Prevention of High Salt Diet-Induced Cardiac Hypertrophy and Fibrosis By Spironolactone 319–323
Avtar Lal, John P. Veinot, and Frans H.H. Leenen

Trandolapril and Endothelin Antagonist LU-135252 in the Treatment of the Fructose-Induced Hypertensive, Hyperinsulinemic, Hypertriglyceridemic Rat 324–328
Orit Ezra-Nimni, David Ezra, Edna Peleg, Klaus Munter, and Talma Rosenthal

Letter to the Editor

Dysphonia Secondary to Perindopril Treatment 329–330
Fernando Javier Vázquez

NUMBER 5, PART 1, MAY 2003

Original Contributions

Acute Hyperlipidemia Increases Oxidative Stress More in African Americans Than in White Americans 331–336
Heno F. Lopes, Jason D. Morrow, Milos P. Stoijiljkovic, Theodore L. Goodfriend, and Brent M. Egan

The DASH Diet Enhances the Blood Pressure Response to Losartan in Hypertensive Patients 337–342
Paul R. Conlin, Thomas P. Erlinger, Arline Bohannon, Edgar R. Miller III, Lawrence J. Appel, Laura P. Svetkey, and Thomas J. Moore

Role of Salt Sensitivity, Blood Pressure, and Hyperinsulinemia in Determining High Upper Normal Levels of Urinary Albumin Excretion in a Healthy Adult Population 343–349
Luigi X. Cubeddu, Irene S. Hoffmann, Lisette M. Aponte, Rosaura Nuñez-Bogesits, Helimenia Medina-Suniaga, Magaly Roa, and Robert S. Garcia

Measures of Brachial Artery Distensibility in Relation to Coronary Calcification 350–355
Matthew J. Budoff, Ferdinand Flores, Jeffrey Tsai, Timothy Frandsen, Hideya Yamamoto, and Junichiro Takasu

Arterial Compliance: A Diagnostic Marker for Atherosclerotic Plaque Burden? 356–362
Bonni Syeda, Michael Gottsauner-Wolf, Stefan Denk, Phillip Pichler, Aliasghar Khorsand, and Dietmar Glogar

Heart Rate and Pulse Pressure Amplification in Hypertensive Subjects 363–370
Pierre Laurent, Pierre Albaladejo, Jacques Blacher, Annie Rudnichi, Harold Smulyan, and Michel E. Safar

Evaluation of Blood Pressure and Baroreflex Sensitivity By Radial Artery Tonometry Versus Finger Arteriolar Photoplethysmography 371–374
Adrienne S. Zion, Matthew N. Bartels, Jill M. Wecht, Richard P. Sloan, John A. Downey, and Ronald E. De Meersman

Arterial Stiffness and Blood Pressure Self-Measurement With Loaned Equipment 375–380
César Calvo-Vargas, Victoria Padilla-Rios, Alicia Meza-Flores, Graciela Vazquez-Linares, Rogelio Troyo-Sanromán, Arturo Panduro Cerda, and Roland Asmar

Antihypertensive Therapy With Verapamil SR Plus Trandolapril Versus Atenolol Plus Chlorthalidone on Glycemic Control 381–386
Heinrich Holzgreve, Roumen Nakov, Katrin Beck, and Hans Uwe Janka

Effect of Losartan on Oxidative Stress-Induced Hypertension in Sprague-Dawley Rats 387–392
Mohamed A. Bayorh, Agaba A. Ganafa, Robin R. Socci, Danita Eatman, Natalia Silvestrov, and Imad K. Abukhalaf

Altered Insulin-Like Growth Factor-1 and Nitric Oxide Sensitivities in Hypertension Contribute to Vascular Hyperplasia 393–400
Brian P. Nolan, Patti Senechal, Sadaf Waqar, Justin Myers, Cynthia A. Standley, and Paul R. Standley

Placental 11β-Hydroxysteroid Dehydrogenase in Dahl and Spontaneously Hypertensive Rats 401–406
Karla Mazancova, Ivan Mikšik, Jaroslav Kuneš, and Jiří Pácha

Editorials

Relevance of the Plasma Renin Hormonal Control System That Regulates Blood Pressure and Sodium Balance for Correctly Treating Hypertension and for Evaluating ALLHAT 407–415
John H. Laragh and Jean E. Sealey

A Specialist in Clinical Hypertension Critiques ALLHAT 416–420
Jay I. Meltzer

Why We Can't Translate Clinical Trials Into Clinical Practice in Hypertension 421–425
Lawrence M. Resnick

Letters to the Editor

Squatting: The Hemodynamic Change Is Induced By Enhanced Aortic Wave Reflection 426
To the Editor: Michael O'Rourke
In Reply: Tomoaki Murakami

Cardiac Angiotensin II: An Intracrine Hormone?. 426–427
Richard N. Re

NUMBER 5, PART 2, MAY 2003

Oral Sessions

1A Renin Angiotensin System: Back to the Future

3A Changing Trends in Risks and Complications of Hypertension

4A Cardiac and Vascular Structure-Function

7A Inflammation, Oxidative Stress and Cardiovascular Disease

8A Addressing Evaluation and Treatment of Hypertension in Special Populations According to Gender, Age, and Race

9A JNC VII

11A Clinical Trials

15A Signaling in Atherosclerosis and Hypertension

16A Genetics of Hypertension

18A Gene Therapy/Pharmacogenetics

19A The Cardiovascular Dysmetabolic Syndrome

21A The Sympathetic System in Hypertension and Heart Failure

22A Vasoactive Hormones/Endothelial Factors

26A Mechanisms of Cardiovascular and Renal Damage in Diabetes and Hypertension

27A Choice for First-Line Antihypertensive Treatment

29A Blood Pressure Monitoring: Diagnostic and Prognostic Implications

32A Oxidative Stress in Different Tissue Systems

33A Controversies in Hypertension Treatment: The Role of Beta Blockers

35A New Frontiers in Pathophysiology and Therapy of Obesity

36A Blood Pressure and Childhood Renal Disease

38A Trends in Blood Pressure Control and Medications

Posters

40A Alternative Medicine

41A Blood Pressure Measurement/Monitoring

67A Cerebrovascular Disease/Stroke

69A Coagulation/Thrombosis

NUMBER 6, JUNE 2003

Original Contributions

High Sensitivity C-Reactive Protein as an Independent Risk Factor for Essential Hypertension 429–433
Ki Chul Sung, Jung Yul Suh, Bum Soo Kim, Jin Ho Kang, Hyang Kim, Man Ho Lee, Jung Ro Park, and Sun Woo Kim

Associations Between Nondipping of Nocturnal Blood Pressure Decrease and Cardiovascular Target Organ Damage in Strictly Selected Community-Dwelling Normotensives 434–438
Satoshi Hoshide, Kazuomi Kario, Yoko Hoshide, Yuji Umeda, Toru Hashimoto, Osamu Kunii, Toshiyuki Ojima, and Kazuyuki Shimada

Effect of Amlodipine, Quinapril, and Losartan on Pulse Wave Velocity and Plasma Collagen Markers in Patients With Mild-to-Moderate Arterial Hypertension 439–444
Marek Rajzer, Marek Klocek, and Kalina Kawecka-Jaszcz

Differential Effect of Acute Angiotensin II Type 1 Receptor Blockade on the Vascular and Adrenal Response to Exogenous Angiotensin II in Humans 445–452
Katja Lottermoser, Thomas Unger, Peter Gohlke, Hans Vetter, and Rainer Düsing

Effect of Quinapril, Quinapril-Hydrochlorothiazide, and Enalapril on the Bone Mass of Hypertensive Subjects: Relationship With Angiotensin Converting Enzyme Polymorphisms 453–459
José L. Pérez-Castrillón, Jesús Silva, Isabel Justo, Alberto Sanz, Miguel Martín-Luquero, Rosa Igea, Pilar Escudero, Carol Pueyo, Cristina Díaz, Gonzalo Hernández, and Antonio Dueñas

Defining the Antihypertensive Properties of the Angiotensin Receptor Blocker Telmisartan By a Practice-Based Clinical Trial 460–466
Thomas D. Giles, George L. Bakris, David H.G. Smith, Giora Davidai, and Michael A. Weber

The Vascular Impact of Aging and Vasoactive Drugs: Comparison of Two Digital Volume Pulse Measurements 467–472
Sandrine C. Millasseau, Ronan P. Kelly, James M. Ritter, and Philip J. Chowienczyk

Age-Associated Changes in Left Ventricular Diastolic Function Are Related to Increasing Left Ventricular Mass 473–477
Abdul-Majeed Salmasi, Audrey Alimo, Ewart Jepson, and Mark Dancy

Characterization of Different High Molecular Weight Angiotensinogen Forms 478–483
Ahmed Ramaha, Jérôme Célérier, and Philip A. Patston

Nonpharmacologic Treatment of Resistant Hypertensives By Device-Guided Slow Breathing Exercises 484–487
Reuven Viskoper, Irena Shapira, Rita Priluck, Rina Mindlin, Larissa Chornia, Anny Laszt, Dror Dicker, Benjamin Gavish, and Ariela Alter

Development of Structural Vascular Changes in Salt-Fed Rats 488–493
Geza Simon, Marta Jaeckel, and Gyorgy Illyes

Brief Communications

Use of an Automated Blood Pressure Recording Device, the BpTRU, to Reduce the "White Coat Effect" in Routine Practice 494–497
Martin G. Myers and Miguel A. Valdivieso

Relationships Between Ambulatory White Coat Effect and Left Ventricular Mass in Arterial Hypertension 498–501
Giuseppe Mulè, Emilio Nardi, Santina Cottone, Giuseppe Andronico, Maria Rosa Federico, Giuseppe Piazza, Vito Volpe, Domenico Ferrara, and Giovanni Cerasola

Hormone Replacement Therapy Improves Membrane Fluidity of Erythrocytes in Postmenopausal Women: An Electron Paramagnetic Resonance Investigation 502–507
Kazushi Tsuda, Yukiko Kinoshita-Shimamoto, Yoshiya Mabuchi, and Ichiro Nishio

Academic Detailing to Improve Antihypertensive Prescribing Patterns 508–511
David Siegel, Julio Lopez, Joy Meier, Mary K. Goldstein, Samuel Lee, Bradley J. Brazill, and Mazen S. Matalka

Editorial

ALLHAT and Beyond 512–514
Michael H. Alderman

NUMBER 7, JULY 2003

Original Contributions

Measurement of Plasma Endothelin-1 in Experimental Hypertension and in Healthy Subjects 515–521
Saad Abdel-Sayed, Juerg Nussberger, Jean-François Aubert, Peter Gohlke, Hans Rudolf Brunner, and Noureddine Brakch

Urinary Tetrahydroaldosterone as a Screening Method for Primary Aldosteronism: A Comparative Study 522–530
Saleh Abdelhamid, Roland Blomer, Gerhard Hommel, Doris Haack, Sabina Lewicka, Peter Fiegel, and Bernd Krumme

Reduced Vagal Activity in Salt-Sensitive Subjects During Mental Challenge 531–536
Konrad Buchholz, Hartmut Schächinger, Miriam Wagner, Arya M. Sharma, and Hans Christian Deter

Is Chronic Inflammation a Determinant of Blood Pressure in the Elderly? 537–543
Michelangela Barbieri, Luigi Ferrucci, Anna Maria Corsi, Claudio Macchi, Fulvio Lauretani, Massimiliano Bonafè, Fabiola Olivieri, Simona Giovagnetti, Claudio Franceschi, and Giuseppe Paolisso

VALUE Trial: Long-Term Blood Pressure Trends in 13,449 Patients With Hypertension and High Cardiovascular Risk 544–548
Stevo Julius, Sverre E. Kjeldsen, Hans Brunner, Lennart Hansson, Francis Platt, Steffan Ekman, John H. Laragh, Gordon McInnes, Anthony M. Schork, Beverly Smith, Michael Weber, and Alberto Zanchetti, for the VALUE Trial

Adolescent Blood Pressure and Blood Pressure Tracking Into Young Adulthood Are Related to Subclinical Atherosclerosis: The Atherosclerosis Risk in Young Adults (ARYA) Study 549–555
Lydia E. Vos, Anath Oren, Cuno Uiterwaal, Wim H.M. Gorissen, Diederick E. Grobbee, and Michiel L. Bots

Prevalence of Left Ventricular Hypertrophy in Patients With Mild Hypertension in Primary Care: Impact of Echocardiography on Cardiovascular Risk Stratification 556–563
María A. Martinez, Teresa Sancho, Eduardo Armada, José M. Rubio, José L. Antón, Alberto Torre, Javier Palau, Paloma Seguido, Jaime Gallo, Isabel Saenz, Enrique Polo, Rosa Torres, José Oliver, and Juan G. Puig, on behalf of the Vascular Risk Working Group "Grupo Monitorización Ambulatoria de la Presión Arterial (MAPA)-Madrid"

Determinants of Exercise Capacity in Hypertensive Patients: New Insights From Tissue Doppler Echocardiography 564–569
Hyung-Kwan Kim, Yong-Jin Kim, Young-Seok Cho, Dae-Won Sohn, Myoung-Mook Lee, Young-Bae Park, and Yun-Shik Choi

Dissociation of Coronary Artery Contractile Hyperreactivity From Hypertension 570–576
Wen Su, Zhenheng Guo, Christian F. Deschepper, David C. Randall, and Ming C. Gong

N-Acetylcysteine Improves Nitric Oxide and α-Adrenergic Pathways in Mesenteric Beds of Spontaneously Hypertensive Rats 577–584
Hélène Girouard, Chantal Chulak, Lingyun Wu, Mireille Lejossec, and Jacques de Champlain

Comparative Study of Sinoaortic Denervated Rats and Spontaneously Hypertensive Rats 585–591
Chao-Yu Miao, Wen-Jun Yuan, and Ding-Feng Su

Brief Communications

Secondary Hypertension Due to a Renin-Producing Teratoma 592–595
Robert N. Pursell and Pamela M. Quinlan

Differential Effects of Lercanidipine and Nifedipine GITS on Plasma Norepinephrine in Chronic Treatment of Hypertension 596–599
Roberto Fogari, Amedeo Mugellini, Annalisa Zoppi, Luca Corradi, Andrea Rinaldi, Giuseppe Derosa, and Paola Preti

Control of Arterial Pressure by Angiotensin II and Nitric Oxide at the Onset of Diabetes 600–603
Michael W. Brands and Leslie J. Cloud

Review

Association Between Transforming Growth Factor-β and Hypertension 604–611
Paul J. Lijnen, Victor V. Petrov, and Robert H. Fagard

Case Report

Abnormalities in Blood Pressure Regulation in a Patient With Parkinson's Disease 612–613
Jose R. Arias-Vera, George A. Mansoor, and William B. White

Editorial

Sodium and Blood Pressure: No Data Dredging, Please! 614–616
Frank M. Sacks, Lawrence J. Appel, George A. Bray, Paul R. Conlin, Thomas J. Moore, Laura P. Svetkey, and William M. Vollmer

NUMBER 8, AUGUST 2003

Original Contributions

Treatment With Rosiglitazone Reduces Hyperinsulinemia and Improves Arterial Elasticity in Patients With Type 2 Diabetes Mellitus 617–622
Marina Shargorodsky, Gulio Wainstein, Eyal Gavish, Ziporah Leibovitz, Dov Matas, and Reuven Zimlichman

Effect of Indapamide SR in the Treatment of Hypertensive Patients With Type 2 Diabetes 623–628
Shi-Wen Kuo, Pei-Dee, Yi-Jen Hung, An-Tsz Hsieh, Ling-Yi Wu, Chang-Hsun Hsieh, Chih-Tsueng He, Tsao-Chin Yang, and Wei-Cheng Lian

How Much Exercise Is Required to Reduce Blood Pressure in Essential Hypertensives: A Dose–Response Study. 629–633
Kazuko Ishikawa-Takata, Toshiki Ohta, and Hirofumi Tanaka

Effect of Body Weight Changes on 24-Hour Blood Pressure and Left Ventricular Mass in Hypertension: A 4-Year Follow-Up. 634–639
Giuseppe Schillaci, Leonella Pasqualini, Gaetano Vaudo, Graziana Lupattelli, Matteo Pirro, Fabio Gemelli, Michele De Sio, Carlo Porcellati, and Elmo Mannarino

A 5-Year Follow-Up of Ambulatory Blood Pressure in Healthy Older Adults 640–645
Iris B. Goldstein, David Shapiro, and Donald Guthrie

Improved Cardiovascular Risk Stratification by a Simple ECG Index in Hypertension. 646–652
Paolo Verdecchia, Fabio Angeli, Gianpaolo Reboldi, Erberto Carluccio, Guglielmo Benemio, Roberto Gattobigio, Claudia Borgioni, Maurizio Bentivoglio, Carlo Porcellati, and Giuseppe Ambrosio

Utility of Automated Brachial Ankle Pulse Wave Velocity Measurements in Hypertensive Patients. 653–657
Masanori Munakata, Nobuhiko Ito, Tohru Nunokawa, and Kaoru Yoshinaga

Elevation of Sympathetic Activity by Eprosartan in Young Male Subjects. 658–664
Karsten Heusser, Jan Vitkovsky, Walter Raasch, Roland E. Schmieder, and Hans P. Schobel

Plasma Carotenoids, Retinol, Tocopherols, and Lipoproteins in Preeclamptic and Normotensive Pregnant Zimbabwean Women. 665–672
Michelle A. Williams, Godfrey B. Woelk, Irena B. King, Laura Jenkins, and Kassam Mahomed

Effects of Taurine and Enalapril on Kidney Function of the Hypertensive Glucose-Intolerant Rat 673–680
Mahmood S. Mozaffari, Noriyuki Miyata, and Stephen W. Schaffer

Brief Communications

Systolic and Diastolic Hypertension: No Relationship With Lipid and Inflammatory Markers in Haute-Garonne, France 681–684
Pedro Marques-Vidal, Jean-Pierre Cambou, Vanina Bongard, Jean-Bernard Ruidavets, and Jean Ferrières

Tumor Necrosis Factor Receptor 2 mRNA in Rat Models of Hypertension 685–688
Ruby C.Y. Lin, Chris G. Schyvens, Yi Zhang, Judith A. Whitworth, and Brian J. Morris

Review

Diabetic Nephropathy and Antihypertensive Treatment: What Are the Lessons From Clinical Trials? 689–697
Anastasios N. Lasaridis and Panteleimon A. Sarafidis

Letter to the Editor

Hypertension Guidelines: Criteria That Might Make Them More Clinically Useful 698–699
To the Editor: Norm Campbell, Ross Feldman, and Denis Drouin
In Reply: Michael H. Alderman, Massimo Volpe, Curt D. Furberg, Rodney Jackson, John B. Kostis, John H. Laragh, Bruce M. Psaty, and Luis Ruilope

NUMBER 9, PART 1, SEPTEMBER 2003

Original Contributions

Expression of the Nuclear Factor-κB and Proto-oncogenes c-Fos and c-Jun Are Induced by Low Extracellular Mg^{2+} in Aortic and Cerebral Vascular Smooth Muscle Cells: Possible Links to Hypertension, Atherogenesis, and Stroke 701–707
Burton M. Altura, Adele B. Kostellow, Aimin Zhang, Wenyan Li, Gene A. Morrill, Raj K. Gupta, and Bella T. Altura

Eicosapentaenoic Acid Inhibits Ca^{2+} Mobilization and PKC Activity in Vascular Smooth Muscle Cells 708–714
Michael D. Nyby, Mark T. Hori, Bernard Ormsby, Ara Gabrielian, and Michael L. Tuck

Treatment With Amlodipine and Atorvastatin Have Additive Effect in Improvement of Arterial Compliance in Hypertensive Hyperlipidemic Patients 715–718
Eyal Leibovitz, Maya Beniashvili, Reuven Zimlichman, Angela Freiman, Marina Shargorodsky, and Dov Gavish

Interactions of L-Arginine, Isosorbide Mononitrate, and Angiotensin II Inhibitors on Arterial Pulse Wave 719–724
Gordon S. Stokes, Edward S. Barin, Kerry L. Gilfillan, and Wayne H. Kaesemeyer

Efficacy of Screening for Primary Aldosteronism by Adrenocortical Scintigraphy Without Discontinuing Antihypertensive Medication 725–728
Hajime Nakahama, Kazuki Fukuchi, Fumiki Yoshihara, Satoko Nakamura, Takashi Inenaga, Shin Takiuchi, Kei Kamide, Takeshi Horio, and Yuhei Kawano

No Evidence of a Relation Between 11β-hydroxysteroid Dehydrogenase Type 2 Activity and Salt Sensitivity . . . 729–733
Olle Melander, Erik Frandsen, Leif Groop, and U. Lennart Hulthén

Effect of Cilazapril With or Without Low Dose Thiazide on LDL Peroxidation in Hypertensive Patients 734–738
Osamah Hussein, Arman Radan, and Viskoper Reuven

Comparative Efficacy and Safety of Nisoldipine Extended-Release (ER) and Amlodipine (CESNA-III study) in African American Patients With Hypertension 739–745
William B. White, Elijah Saunders, Robert J. Noveck, and Keith Ferdinand

Cerebral Autoregulation Indices Are Unimpaired by Hypertension in Middle Aged and Older People 746–753
Penelope J. Eames, Melanie J. Blake, Ronney B. Panerai, and John F. Potter

Increased Levels of Insulin-Like Growth Factor Binding Protein-3 in Hypertensive Patients With Carotid Atherosclerosis 754–760
Takuya Watanabe, Masashi Itokawa, Yukiko Nakagawa, Takashi Iguchi, and Takashi Katagiri

Peroxynitrite Versus Nitric Oxide in Early Diabetes 761–766
Robert D. Hoeldtke, Kimberly D. Bryner, Daniel R. McNeill, Gerald R. Hobbs, and Chris Baylis

Plasma Homocysteine Concentration and Blood Pressure in Young Adult African Americans 767–770
Rajani Dinavahi, Nicole Cossrow, Harvey Kushner, and Bonita Falkner

Renal Interstitial Ca^{2+} During Sodium Loading of Normotensive and Dahl-Salt Hypertensive Rats 771–776
Cassandra E. Palmer, M. Audrey Rudd, and Richard D. Bukoski

Brief Communication

Chlamydia pneumoniae and Epstein-Barr Antibodies Are not Associated With Carotid Thickness: The Effect of Hypertension 777–780
Vassiliki C. Pitiriga, Vasilios T. Kotsis, Vassiliki Gennimata, Maria-Eleni K. Alexandrou, Christos M. Papamichail, Dimitrios N. Mitsibounas, Vassiliky D. Petrocheilou-Paschou, and Nikos A. Zakopoulos

Review

Aldosterone Breakthrough During Angiotensin-Converting Enzyme Inhibitor Therapy 781–788
Atsuhisa Sato and Takao Saruta

Editorial

NHLBI's Conflict of Interest: Why We Need the Data Quality Act 789–791
David A. McCarron

Letter to the Editor

Midwall Fractional Shortening in Physiologic and Pathologic Left Ventricular Hypertrophy 792–793
Sheng-Jing Dong

NUMBER 9, PART 2, SEPTEMBER 2003

Editorial

From Hypertension to Heart Failure: Breaking the Chain of Cardiovascular Disease 1S–3S
Vasilios Papademetriou

Original Contributions

The Burden of Cardiovascular Disease: Following the Link From Hypertension to Myocardial Infarction and Heart Failure. 4S–6S
Henry R. Black

Role for β-Blockers in the Management of Diabetic Kidney Disease 7S–12S
George L. Bakris

Optimizing Antihypertensive Treatment in Clinical Practice 13S–17S
Jan N. Basile

From Hypertension to Heart Failure: Update on the Management of Systolic and Diastolic Dysfunction 18S–22S
John B. Kostis

NUMBER 10, OCTOBER 2003

Original Contributions

A Double-Blind, Placebo-Controlled, Dose–Response Study of the Effectiveness and Safety of Lisinopril for Children With Hypertension 795–800
Beth Soffer, Zhongxin Zhang, Kenneth Miller, Beth A. Vogt, and Shahnaz Shahinfar, for the Lisinopril Pediatric Hypertension Collaborative Study Group

Gestational Calcium Supplementation and Blood Pressure in the Offspring 801–805
Daniel C. Hatton, Jane Harrison-Hohner, Sarah Coste, Mark Reller, and David McCarron

Serum Potassium and Stroke Risk Among Treated Hypertensive Adults 806–813
Nicholas L. Smith, Rozenn N. Lemaitre, Susan R. Heckbert, Robert C. Kaplan, David L. Tirschwell, W. T. Longstreth Jr., and Bruce M. Psaty

Hemodynamic Effects of Chronic Hemodialysis Therapy Assessed by Pulse Waveform Analysis 814–817
Crystal A. Gadegbeku, M. Zakarea Shrayyef, and Michael E. Ullian

Blood Pressure and Cognitive Functioning Among Independent Elderly. 818–826
Esther Paran, Ofra Anson, and Haim Reuveni

Agonistic AT_1 Receptor Autoantibodies and Monocyte Stimulation in Hypertensive Patients 827–833
Yvonne Dörffel, Gerd Wallukat, Nicolai Bochnig, Volker Homuth, Matthias Herberg, Wolf Dörffel, Axel Pruss, Rabih Chaoui, and Jürgen Scholze

Effects of Endothelial Nitric Oxide Synthase, α-Adducin, and Other Candidate Gene Polymorphisms on Blood Pressure Response to Hydrochlorothiazide 834–839
Stephen T. Turner, Arlene B. Chapman, Gary L. Schwartz, and Eric Boerwinkle

β-Adducin Polymorphisms, Blood Pressure, and Sodium Excretion in Three European Populations 840–846
Valérie Tikhonoff, Tatiana Kuznetsova, Katarzyna Stolarz, Giuseppe Bianchi, Edoardo Casiglia, Kalina Kawecka-Jaszcz, Yuri Nikitin, Laura Tizzone, Ji-Guang Wang, and Jan A. Staessen, on behalf of the European Project on Genes in Hypertension (EPOGH) Investigators

T594M Variant of the Epithelial Sodium Channel β-Subunit Gene and Hypertension in Individuals of African Ancestry in South Africa 847–852
Benedicta Nkeh, Nilesh J. Samani, Danelle Badenhorst, Elena Libhaber, Pinhas Sareli, Gavin R. Norton, and Angela J. Woodiwiss

Disruption of the Type 2 Dopamine Receptor Gene Causes a Sodium-Dependent Increase in Blood Pressure in Mice 853–858
Atsushi Ueda, Ryoji Ozono, Tetsuya Oshima, Ai Yano, Masayuki Kambe, Yasuhiro Teranishi, Motoya Katsuki, and Kazuaki Chayama

Association of Polymorphisms in the Promoter Region of the PNMT Gene With Essential Hypertension in African Americans but not in Whites 859–863
Jing Cui, Xiaofeng Zhou, Irmarie Chazaro, Anita L. DeStefano, Athanasios J. Manolis, Clinton T. Baldwin, and Haralambos Gavras

Renal Renin-Angiotensin System Activity in Naturally Reared and Cross-Fostered Spontaneously Hypertensive Rats 864–869
Ingrid Gouldsborough, George B.M. Lindop, and Nick Ashton

Brief Communications

β-Blockers in Hypertension—The Emperor Has No Clothes: An Open Letter to Present and Prospective Drafters of New Guidelines for the Treatment of Hypertension 870–873
Franz H. Messerli, D. Gareth Beevers, Stanley S. Franklin, and Thomas G. Pickering

Vascular Effects of Sildenafil in Hypertensive Cardiac Transplant Recipients 874–877
Richard S. Schofield, David G. Edwards, Brian T. Schuler, Juan Estrada, Juan M. Aranda Jr., Daniel F. Pauly, James A. Hill, Rahul Aggarwal, and Wilmer W. Nichols

Blood Pressure Control in the Hypertension Clinic. 878–880
Nisha Bansal, Beatriz E. Tendler, William B. White, and George A. Mansoor

Review

Neurogenic Essential Hypertension Revisited: The Case for Increased Clinical and Research Attention 881–888
Samuel J. Mann

Editorial

Successes and Shortcomings of the Food and Drug Modernization Act 889–891
Joseph T. Flynn

Letters to the Editor

Endothelial Dysfunction in Sustained and White Coat Hypertension. 892
Yesari Karter, Nurver Ertürk, Seval Aydín, Aslí Çurgunlu, Hafize Uzun, Suphi Vehid, Ayşe Öztürk Kutlu, Adnan Yaldıran, Esin Öztürk, Serap Erdine, and Fikret Sipahioğlu

Regulatory Mechanisms Underlying Decreased Bone Mineral Density in Women With Essential Hypertension 893
Kazushi Tsuda

NUMBER 11, PART 1, NOVEMBER 2003

Original Contributions

Changes in Cardiovascular Risk by Reduction of Left Ventricular Mass in Hypertension: A Meta-Analysis 895
Paolo Verdecchia, Fabio Angeli, Claudia Borgioni, Roberto Gattobigio, Gianni de Simone, Richard B. Devereux, and Carlo Porcellati

Blunted Nocturnal Fall in Blood Pressure and Left Ventricular Mass in Elderly Individuals With Recently Diagnosed Isolated Systolic Hypertension 900
Paolo Cicconetti, Sergio Morelli, Luigi Ottaviani, Flavia Chiarotti, Caterina De Serra, Paolo De Marzio, Marianna Costarella, Alessandro Sgreccia, Veronica Ciotti, and Vincenzo Marigliano

Hypertension Care and Control in Underserved Urban African American Men: Behavioral and Physiologic Outcomes at 36 Months 906
Martha N. Hill, Hae-Ra Han, Cheryl R. Dennison, Miyong T. Kim, Mary C. Roary, Roger S. Blumenthal, Lee R. Bone, David M. Levine, and Wendy S. Post

Carotid Sinus Stimulation Responses Are Related With Arterial Elastic Properties In Hypertensive Subjects 914
Costas Tsioufis, Costas Thomopoulos, Taxiarchou Efstathios, Konstantinos Toutouzas, Eleftherios Tsiamis, Ioannis Kallikazaros, Christodoulos Stefanadis, and Pavlos Toutouzas

Acute Caffeine Intake Influences Central More Than Peripheral Blood Pressure in Young Adults 919
W. Stephen Waring, Judith Goudsmit, John Marwick, David J. Webb, and Simon R.J. Maxwell

Efficacy of Low-Dose Spironolactone in Subjects With Resistant Hypertension 925
Mari Konishi Nishizaka, Mohammad Amin Zaman, and David A. Calhoun

Effect of Dual Angiotensin Converting Enzyme/Neutral Endopeptidase Inhibition, Angiotensin Converting Enzyme Inhibition, or AT_1 Antagonism on Coronary Microvasculature in Spontaneously Hypertensive Rats 931
Qian Pu, Isabelle Larouche, and Ernesto L. Schiffrin

Influence of Low High-Density Lipoprotein Cholesterol on Left Ventricular Hypertrophy and Diastolic Function in Essential Hypertension 938
Takeshi Horio, Junko Miyazato, Kei Kamide, Shin Takiuchi, and Yuhei Kawano

The Arg16Gly Polymorphism of the β2-Adrenergic Receptor and Left Ventricular Systolic Function 945
Weihong Tang, Richard B. Devereux, Dalane W. Kitzman, Michael A. Province, Mark Leppert, Albert Oberman, Paul N. Hopkins, and Donna K. Arnett

Association Between Microalbuminuria and the Metabolic Syndrome: NHANES III 952
Latha Palaniappan, Mercedes Carnethon, and Stephen P. Fortmann

Long-Term Effects of Intensive Blood Pressure Lowering on Arterial Wall Stiffness in Hypertensive Patients 959
Atsuhiro Ichihara, Matsuhiko Hayashi, Yukako Koura, Yuko Tada, Nobuhisa Hirota, and Takao Saruta

Effects of Exercise and β-Blocker on Blood Pressure and Baroreflexes in Spontaneously Hypertensive Rats 966
Naoyoshi Minami, Takashi Yoshikawa, Hitomi Kataoka, Nobuyoshi Mori, Makoto Nagasaka, Hajime Kurosawa, Masayuki Kanazawa, and Masahiro Kohzuki

Cellular Mechanisms of Insulin Resistance in Rats With Fructose-Induced Hypertension 973
Cristiana Catena, Gilberta Giacchetti, Marileda Novello, Gianluca Colussi, Alessandro Cavarape, and Leonardo A. Sechi

Role of Systolic Blood Pressure on the Progression of Kidney Damage in an Experimental Model of Type 2 Diabetes Mellitus, Obesity, and Hypertension (Zucker Rats). 979
Olga González-Albarrán, Oscar Gómez, Esther Ruiz, Paula Vieitez, and Rafael García-Robles

NUMBER 11, PART 2, NOVEMBER 2003

Editorial

Introduction: New Directions in Hypertension: Beyond JNC VI 25S
Thomas D. Giles

Original Contributions

Examining Therapeutic Goals: Population Versus Individual-Based Approaches 26S–30S
Thomas D. Giles

Are There Benefits to Specific Antihypertensive Drug Therapy? 31S–35S
William C. Cushman

Is It Time to Move to Multidrug Combinations? 36S–40S
James L. Pool

Recommendations for Special Populations: Diabetes Mellitus and the Metabolic Syndrome. 41S–45S
James R. Sowers

Recommendations for the Management of Special Populations: Renal Disease in Diabetes 46S–49S
Leopoldo Raij

Recommendations for the Management of Special Populations: Racial and Ethnic Populations. 50S–54S
Keith C. Ferdinand

Evaluation and Post-Test for CME 56S–58S

NUMBER 12, DECEMBER 2003

Original Contributions

Likelihood Ratios in the Diagnosis of Renal Artery Stenosis by Magnetic Resonance Angiography Compared With Renal Angiography 987–992
Nizar Attallah, Jerry Yee, Adrienne Gutierrez, Joseph Musial, and Raviprasenna Parasuraman

Expression of Endothelial Angiotensin II Receptor mRNA in Pregnancy-Induced Hypertension 993–999
Yuko Takeda-Matsubara, Keiichi Matsubara, Hiroshi Ochi, Masaharu Ito, Masaru Iwai, and Masatsugu Horiuchi

The Effect of Rapid Decreases of Blood Pressure by Different Mechanisms on Coronary Flow and Flow Reserve in Normal Coronary Arteries 1000–1005
Vassilis Voudris, Dimitrios Avramides, Plamen Gatzov, John Malakos, John Skoularigis, Athanassios Manolis, Haralambos Gavras, Irene Gavras, and Dennis V. Cokkinos

Impact of Renin-Angiotensin-Aldosterone System Gene Variants on the Severity of Hypertension in Patients With Newly Diagnosed Hypertension 1006–1010
Armindo D. Tiago, Danelle Badenhorst, Benedicta Nkeh, Geoffrey P. Candy, Richard Brooksbank, Pinhas Sareli, Elena Libhaber, Nilesh J. Samani, Angela J. Woodiwiss, and Gavin R. Norton

Angiotensinogen Met235Thr Polymorphism, Angiotensin-Converting Enzyme Inhibitor Therapy, and the Risk of Nonfatal Stroke or Myocardial Infarction in Hypertensive Patients. 1011–1017
Joshua C. Bis, Nicholas L. Smith, Bruce M. Psaty, Susan R. Heckbert, Karen L. Edwards, Rozenn N. Lemaitre, Thomas Lumley, and Frits R. Rosendaal

Alpha-Adducin Polymorphism, Salt Sensitivity, Nitric Oxide Excretion, and Cardiovascular Risk Factors in Normotensive Hispanics 1018–1024
Ana M. Castejon, Anna B. Alfieri, Irene S. Hoffmann, Abbu Rathinavelu, and Luigi X. Cubeddu

The Limited Value of Plasma B-type Natriuretic Peptide for Screening for Left Ventricular Hypertrophy Among Hypertensive Patients 1025–1029
Motoyuki Nakamura, Fumitaka Tanaka, Shinetsu Yonezawa, Kenyu Satou, Masahide Nagano, and Katsuhiko Hiramori

Direct Comparison of the Effects of Valsartan and Amlodipine on Renal Hemodynamics in Human Essential Hypertension. 1030–1035
Christian Delles, Arnfried U. Klingbeil, Markus P. Schneider, Renate Handrock, Gottfried Weidinger and Roland E. Schmieder

Antihypertensive Effects of Two Fixed-Dose Combinations of Losartan and Hydrochlorothiazide versus Hydrochlorothiazide Monotherapy in Subjects With Ambulatory Systolic Hypertension 1036–1042
Yves Lacourcière and Luc Poirier

Blood Pressure Response to Hypoxia: Role of Nitric Oxide Synthase 1043–1048
Cyril H. Barton, Zhenmin Ni, and Nosratola D. Vaziri

Oxidative Stress in Hypertensive, Diabetic, and Diabetic Hypertensive Rats 1049–1052
Joseph Friedman, Edna Peleg, Tamara Kagan, Sergei Shnizer, and Talma Rosenthal

The Effects of Allicin on Weight in Fructose-Induced Hyperinsulinemic, Hyperlipidemic, Hypertensive Rats . . . 1053–1056
Amitai Elkayam, David Mirelman, Edna Peleg, Meir Wilchek, Talia Miron, Aharon Rabinkov, Mor Oron-Herman, and Talma Rosenthal

Brief Communications

Volume Expansion Enhances Plasma Endothelin-1
Saad Abdel-Sayed, Hans Rudolf Brunner, and Juerg Nussberger 1057–1061

Digoxin Antibody Prevents Cerebral Hemorrhage-Induced Hypertension 1062–1065
João C. Menezes and Varujan Dichtchekenian

Reviews

Tolerability and Treatment Compliance With Angiotensin II Receptor Antagonists 1066–1073
Giuseppe Mancia, Gino Seravalle, and Guido Grassi

Experimental Evidence for Blood Pressure-Independent Vascular Effects of High Sodium Diet 1074–1078
Geza Simon

Editorial

Diagnosis of Renal Artery Stenosis: Combining Gadolinimum-Enhanced Three-Dimensional Magnetic Resonance Angiography with Functional Magnetic Resonance Pulse Sequences 1079–1082
Hong Lei Zhang, Stephan O. Schoenberg, Lawrence M. Resnick, and Martin R. Prince
